Office Action Summans	10/667,944	RASTOGI ET AL.				
Office Action Summary	Examiner	Art Unit				
	Mathieu D. Vargot	1732				
The MAILING DATE of this communication app Period for Reply	pears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status

Art Unit: 1732

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wrue et al generally for reasons of record noting the following.

First of all, the rocking motion of the lens mold 20 would of course apply a force on the lens normal to and away from the mold to facilitate the separation of the lens from the mold. This is precisely what the reference is disclosing at column 4, lines 62-64. The only thing lacking is the aspect of moving the lens rather than the mold. However, since the two would be moved relatively with respect to each other according to that taught in Wrue et al and that set forth in the instant claims, it is respectfully submitted that the two methods are obvious variants over each other. In other words, if it is known from Wrue et al to rock the mold to dislodge the lens therefrom, it surely would have been obvious to have moved the lens rather than the mold to achieve the same result. Newly added claims 49 -56 are considered to be obvious over the applied reference. The application of forces to move the lens and mold in a relative tangential manner would improve the yield of lenses so that the pick yield would be high and the instant yield would be an obvious parameter in the method of Wrue et al. Also, it is well known to produce lenses according to a desired diopter and stock them accordingly (ie, Sku) and such would have been an obvious feature in the method of Wrue et al in order to provide the necessary lenses.

2.Applicant's arguments filed September 20, 2006 have been fully considered but they are not persuasive. Applicant's comments have been noted but are not persuasive. While it is realized that he claims call for moving the lens, the bottom line in the instant process-- and that disclosed in Wrue et al—is to move the lens and the mold tangentially with respect to each other to facilitate release of the lens from the mold. It is respectfully submitted that one of ordinary skill in this art would realize that moving either the lens or the mold to achieve this relative motion would be obvious variants over each other.

3.**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

4.Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mathieu D. Vargot whose telephone number is 571 272-1211. The examiner can normally be reached on Mon-Fri from 9 to 6.

Application/Control Number: 10/667,944 Page 4

Art Unit: 1732

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Johnson, can be reached on 571 272-1176. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
